HASHEESH OF GREECE.

How This Strange Drug is Prepared For Consumption.

Consul Edward I. Nathan of Patris, Greece, writes about the Greek preparation and exportation of hashesh: "Hashesh, that strange drug which has given our language its word 'assassin'—a man so frenzied by the drug that he accomplishes murder—is used by the Persian, Turk and Egyptians in a manner akin to the use of opium by the Chinese. It is the product of a plant grown in large quantities in the Peloponnesus (southern Greece), in the district about Tripolitza. The plant grows to a height of about four feet, and its branches are thickly covered with small leaves and studded with tiny seeds.

"The entire plant, stalk and branches, is cut within a few inches of the root and laid out in the sun to dry. The branches are then rubbed to separate the seeds, and these in turn are ground into a fine powder, which constitutes the drug. The drug has the power of inducing sleep and producing pleasant and fantastic dreams. Continued use of hashesh renders its devotees wild and reckless and results in a complete wreck of their mental and physical constitution.

"For this reason the Egyptian government has prohibited the importation of the drug and recently entered into a convention with Greece to prevent its exportation from there to Egypt, where the consumers of hashesh are very numerous. The drug is practically never used in Greece, but is now exported to the various ports in England, Austria, France and Italy, and from there much, no doubt, ultimately finds its way to Egypt."

IMPROVED HARVESTER.

Motor Attachment Lightens Work of Horse.

Harvesting machines pulled and operated by horses or by traction engines are a familiar sight in the grain growing sections of the country, but a new departure is a harvester the machinery of which is operated by a gasoline motor, although the complete outfit is pulled by horses.

With such an equipment it is claimed that the farmer can harvest his crops with one-half the horses otherwise necessary, as by the usual method the horses not only pull the machine over the ground, but have to pull hard enough to produce the power to operate the cutting, elevating and binding machinery. The illustration shows a six horse machine pulled by three horses.

The motor is so constructed that it can be quickly attached or detached to

HORSE AND MOTOR HARVESTER.

any make of harvester. In attaching it no alterations are necessary, and but a few minutes' time is taken in connecting the sprocket wheel of the motor to the driving sprocket of the harvester. The starting of the harvester by the horses starts the motor. If any accident should happen or the fuel run out, the driving chain can be quickly removed and the machine operated by horses, as before. In operation the motor is rigidly and securely attached to the main frame of the machine and when detached can be used for any other work on the farm requiring power.—Popular Mechanics.

Making Artificial Lumber.

It has been said on competent authority that our forests will be entirely gone in about thirty years. In fact, the increased price of lumber is a sure indication of its growing scarcity. Inventors have already set to work devising compositions which can be substituted for wood. At the present time picture molding and similar articles are made of compressed wood pulp, with an exterior covering resembling the grain of the tree. Artificial lumber on a more extensive scale has been designed by a Pennsylvania man. It is formed by the successive superimposition of very thin continuous pulpy layers of combined hydraulic cement and asbestos fiber. Imbedded between the layers is a wire mesh similar to that used in wired glass and in concrete construction. The inventor claims that this artificial lumber possesses stability and durability and can be used for lumber in all cases.—Washington Star.

Fuel For Jerusalem.

A German geological expert was in the Dead sea region recently, charged by the sultan of Turkey with the task of examining and reporting on the mineral and other possibilities of the district. Coal is believed to exist in profitable quantity, and a solution may thus be found for the problem, which grows more pressing every year, of providing Jerusalem with fuel. At present \$10 per ton has to be paid for coal or patent fuel—briquets.

New Railway Signal.

A. E. Beckley of New York has designed an optical signal for railroad crossings that is self operative. It consists of two mirrors fastened at different angles on a post at the opposite right hand side of the crossing, so as

THE STATE UNIVERSITY

LEXINGTON, KENTUCKY.

The State University, Lexington, Kentucky, offers the following courses, namely, Agricultural, Mechanical Engineering, Civil Engineering, Electrical Engineering, Mining Engineering, Classical and seven Scientific courses each of which extends over four years and leads to a Bachelor's degree; also a department of Law and a Department of Education, which last has been established instead of the Normal School. Persons who enter this department prepare for advanced work in pedagogy and are granted a Bachelor's degree in this subject when completed. The Academy for preparatory instruction is retained.

County appointees receive free tuition, privilege of residence in the dormitories, fuel and light, traveling expenses, if they remain ten consecutive months, or one collegiate year.

The laboratories and museum are large, well equipped, comprehensive and modern. Military Science is fully provided for as required by Congress.

The graduates in the several courses of study readily find employment with liberal remuneration. The total number of matriculates for last year was 1078. Each department has a specialist at its head, with the necessary number of assistants.

Young women find an excellent home, with board and lodging, in Patterson Hall, which is well equipped with all the modern conveniences, bath-room, hall for physical culture, at \$3.00 per week. All courses of study in the University are open to women on identical conditions with those applying to males.

The completion of the Agricultural, Mining Engineering Laboratory and Education buildings afford ample and commodious quarters for these departments, which are rapidly increasing in the number of matriculates.

For catalogues, methods of obtaining appointments, information regarding courses of study and terms of admission, apply to

JAMES K. PATTERSON, Ph. D., LL. D., President
 or to **D. C. FRAZEE, Business Agent.**

Fall Term Begins Sept. 10, 1908.

A Hard Job.

"Didn't you say six months ago that if Miss Tipkins wouldn't marry you you would throw yourself into the deepest part of the sea? Now, Miss Tipkins married some one else three months ago and yet you haven't—"
 "Oh, it's easy to talk, but let me tell you it is not such an easy matter to find the deepest part of the sea."

Substitutes.

Doctor—Have you given him the champagne and oysters, as I ordered?
 Patient's Wife—Well, no, sir, I couldn't afford that, so I got him some ginger beer and whelks instead. Do it matter, sir?—London Telegraph.

Reminders.

Counsel to (witness)—Now, allow me to remind you of what happened to Balaam. Witness—Certainly. But allow me to remind you that it was the ass that warned him.

DANGER IN DELAY

Kidney Diseases Are Too Dangerous for Hopkinsville People to Neglect.

The great danger of kidney troubles is that they get a firm hold before the sufferer recognizes them. Health is gradually undermined. Backache, headache, nervousness, lameness, soreness, lumbago, urinary troubles, dropsy, diabetes and Bright's disease follow in merciless succession. Don't neglect your kidneys. Cure the kidneys with the certain and safe remedy, Doan's Kidney Pills, which has cured people right here in Hopkinsville.

Miss L. A. Hester, 826 North Main street, Hopkinsville, Ky., says:

"I honestly believe that there is little need of any one suffering the torture of backache when such an effective remedy as Doan's Kidney Pills can be procured at L. A. Johnson's drug store. The prompt and thorough relief which followed their use in my case has given me abiding faith in their merits. In the summer of 1903, I was suffering greatly from soreness and lameness across the small of my back and other difficulties arising from a weakness of the kidneys. Two boxes of Doan's Kidney Pills was all I required to free me from the distressing pain in my back and restore my kidneys to a good healthy condition. I recommended Doan's Kidney Pills at that time and during the four years which have elapsed, I still have the same good opinion of the remedy."

For sale by all dealers. Price 50 cents, Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doans—and take no other.
